Instructions to Students

- Answer the given question through a technical presentation. Total Marks: 100.
- Clearly define the problem and explain the concept of algorithm growth functions.
- Present comparative analysis using appropriate representations such as graphs, tables, or charts.
- Use suitable tools (PowerPoint, visualization tools, or software) to support your explanation.
- Ensure technical accuracy, logical flow, and proper interpretation of results.
- Maintain clarity in communication, proper slide organization, and professional delivery.
- Time management, confidence, and audience engagement will be considered during evaluation.

GRAND TOTAL:		100 Marks	

SECTION A – Technical Presentation

Q22. Master Theorem for Non-Linear Recurrence

Consider the recurrence relation $T(n) = 5T(n/2) + n^2$. Analyze the problem using the Master Theorem and determine the time complexity. Clearly explain each case and justify the selected case based on comparison of functions. Use diagrams such as recursion trees for better understanding. Present the solution clearly and interpret the result.
